MITOCHONDRIAL DNA CHARACTERIZATION OF INDIGENOUS STRAINS OF COMMON CARP (Cyprinus carpio)

by

Write your full name here.

A Thesis Submitted in Partial Fulfillment of the Requirements for the Degree of Master of Science in Aquaculture and Aquatic Resources Management

Examination Committee: Name of Chairperson (Chairperson)

Committee Member Committee Member

Nationality: Thai

Previous Degree: Bachelor of Engineering in Computer Engineering

Kasetsart University

Thailand

Scholarship Donor: Government of Switzerland*

Asian Institute of Technology School of Engineering and Technology Thailand April 2002

ACKNOWLEDGMENTS

INTRODUCTION

1.1 Background of the Study

Start your paragraph here; justified, 0.5" indentation. Maintain a 1.5 line spacing throughout. This section should consist of 2 pages maximum excluding figures and tables. This is NOT a Literature Review section.

Each paragraph should have at least 4 sentences. Paragraphs of more than 6 sentences should be split into two paragraphs. Follow the appropriate structure of writing a clear paragraph. Consult your adviser about the subsections. Maintain one space between the last line of this section and the next subsection.

Chaky: Background

- Why you choose this field? "recent days, GAN has attracted a lot of researcher interest. ..."
- What have been done?

1.2 Statement of the Problem

Write approximately three paragraphs only. Each paragraph should have at least 4 sentences. Paragraphs of more than 6 sentences should be split into two paragraphs. Follow the appropriate structure of writing a clear paragraph.

Chaky: Problem

- The problem of the related work "However ..."
- Be specific

Chaky: Solution

- This paper [investigates—explores—models—experiments] ...
- Convince
- Measure

Chaky: Results

- Expected Result; - What you have started?

Chaky: Contribution

- What is new? [Knowledge—Artifact—Methodology—Theory]

1.3 Research Questions- Discuss with your adviser.

Introduce your research questions in one sentence followed by a bulleted list, leftaligned.

1. Follow a 0.5" Tab setting

2.

1.4 Objectives of the Study

Introduce your main objective first in one sentence, followed by a bulleted list of specific objectives, left aligned.

- Follow a 0.5" Tab setting
- •
- •

1.5 Write the next section here.

Start your paragraph here.

1.6 Organization of the Thesis

Start your paragraph here.

Table 1.1 *Random Table*

| v1 | v2 | v3 | Overall |
|--------|--------|--------|---------|
| 78.67% | 87.33% | 94.92% | 85.64% |

Table 1.2 *Random Table 2*

| v1 | v2 | v3 | Overall |
|--------|--------|--------|---------|
| 78.67% | 87.33% | 94.92% | 85.64% |

Random Figure

LITERATURE REVIEW

Write your introductory paragraph/s here (except for Chapter 1). Limit this section to two paragraphs. Follow the appropriate structure of writing paragraphs. Paragraphs should have at least four sentences. Paragraphs with more than 6 sentences must be split into two paragraphs.

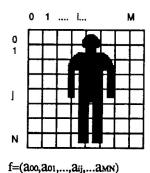

2.1 Section Name in Literature Review

Yamato et al. (1992) apply the background subtraction technique to extract blobs or human from a scene by the following conditions:

if
$$|I_a(x,y) - I_b(x,y)| < T$$
, $I_e(x,y) = 0$
else $I_e(x,y) = I_a(x,y)$,

where $I_e(x,y)$ is a human extracted image, $I_a(x,y)$ is an original image, $I_b(x,y)$ is a background image, and T is a threshold. Figure 2.1 shows something. Some work also uses mesh features (Yamato et al., 1992).

Figure 2.1 *Mesh feature calculation. Reprinted from the work of Yamato et al. (1992).*

aij=number of black mesh(ij)/MmNm

Table 2.1 *Random Table 3*

| v1 | v2 | v3 | Overall |
|--------|--------|--------|---------|
| 78.67% | 87.33% | 94.92% | 85.64% |

2.2 Chapter Summary

METHODOLOGY

Write your introductory paragraph/s here (except for Chapter 1). Limit this section to two paragraphs. Follow the appropriate structure of writing paragraphs. Paragraphs should have at least four sentences. Paragraphs with more than 6 sentences must be split into two paragraphs.

3.1 Your section

5.2 Chapter Summary

REFERENCES

Yamato, J., Ohya, J., & Ishii, K. (1992). Recognizing human action in time-sequential images using hidden Markov model. In *International Conference on Computer Vision and Pattern Recognition (CVPR)* (pp. 379–385).

APPENDIX A

SURVEY QUESTIONNAIRE

Different materials are presented in the APPENDICES. Label the materials in the order that they are mentioned in the text or section (e.g., "see Appendix A for the questions"). Large or oversized tables or figures that support, but are not important in the text, are included in the appendices in a portrait or landscape orientation.

APPENDIX B

TITLE

Multiple texts, tables and/or figures can be combined in one appendix. They should be referred to in a section or parts of your thesis. Number and title the materials in the order they are mentioned in the sections. Add a short description of Appendix A. Do the same for other appendices with multiple materials.

Figure B1

CCTV monitoring room. Reprinted from the Twenty First Security Web site (http://www.twentyfirstsecurity.com.au/).
